### For Immediate Release

### **Journey through Fantastic Worlds with Kinolife's Virtual "Best Sci-Fi Film Fest"**

**Gaithersburg, MD (November 2, 2020)** Gaithersburg's *Arts on the Green*, in cooperation with Kinolife Distribution, presents the "Best Sci-Fi Film Fest." Set off on a journey through fantastic worlds all from the safety and comfort of your own home. Enjoy the eight short films on either November 20 or 21. A virtual live interactive Question and Answer session with local science fiction writers starts at 7 p.m. each evening, followed by the film screenings at 7:45 p.m. Tickets are \$10 per household. This program is appropriate for ages 13 and older. Purchase tickets online [here](#). A Zoom link will be e-mailed to registered participants one hour before the event.

The future has come. It got tired of waiting on the doorstep and burst into houses, filling our rooms and our lives. It is not easy to surprise us with something. That's why science fiction is becoming more inventive, impressive and incredible, although we have come to realize that everything that happens on the screen today can become our reality tomorrow.

"Best Sci-Fi Film Fest" is the first global "traveling" science fiction and fantasy film festival. Originating in Kiev and held in more than 13 countries, more than 1,000 films were viewed, leading to the selection of the best eight shorts. Noted science fiction writer Bob Greenberger and Maryland local writers Valerie Mikles and Rich White will host a live, interactive question and answer session before each showing, discussing with the audience how science fiction and reality are sometimes indistinguishable. Get a sneak preview [here](#).
